

Time Problems

1. Fred leaves his house at twenty minutes to nine to walk to school.
It takes him and his mum 10 minutes to walk to school.
What time does he arrive at school?
2. The toaster takes 3 minutes to toast the bread. How long is the toaster working for if it is filled four times?
3. Hiba does her homework for 45 minutes.
What fraction of one hour is this?
4. A cartoon lasts for 15 minutes.
How many cartoons can you watch in one hour?
5. A cake takes 45 minutes to bake in the oven.
It then needs 30 minutes to cool before you can start decorating it.
How long is it between putting the cake in the oven and being able to decorate it?
6. How many hours are there altogether in Wednesday, Thursday and Friday?
7. A football match lasts for 90 minutes.
How many hours is this?
8. Kelly goes for a run. It takes her 20 minutes to get from her home to the park, then half an hour to run around the park and then 20 minutes to get back home.
How long is her run in total?
